TIPS

Your resume objective should provide a short, simple and clear statement about the kind of position you wish to obtain. An objective is not required for your resume, but it can help show the reader how the job position or program relates to your personal goals. Here are some examples:

"Summer internship in the Biology Lab"

"Obtain a position in which I can learn more about business and finance"

"Part-time sales position in retail"

If you're not sure about your objective, think about jobs that use skills and talents that you have or positions that could help you learn more about areas
About Me: Personality/Career Surveys

Personality Profile

Confidential Report

Your final personality score is determined by additional factors that may not be represented on this graph.

Introduction

Of the many factors that contribute to a successful future, an understanding of Personality Type is among the most useful.

While interests and skills change during the course of a person’s life, the one thing that does remain constant is an individual’s Personality Type - the innate way each person naturally prefers to see the world and make decisions. And although all individuals are unique, people of the same type share enormous similarities in the kinds of academic subjects and careers they find interesting, and the kind of work they find satisfying.

By understanding the role Personality Type plays, people can gain important insights into their educational, career, and relationship needs. And because people of different types often communicate in very different ways, counselors and teachers can learn which strategies work most effectively with each individual student.

College Search (4,167 schools available)

1. Click
Click a criteria item in the left column and enter your data to get started.

2. Rank
Rank how important each of your criteria items is to your decision.

3. Shazamm!
Check out the school results, and find the schools that are right for you!
If there's a school you want to keep an eye on while you search, you can pin it to the top of your results list. It'll stay there until you unpin it.

There are two ways to pin a school: search for it by name or check the "Pin It!" box.

Once you've pinned more than one school, you can compare them side by side using the "I want to..." menu located above the results list.

In Compare View, schools are lined up from left to right in the order you pinned them. If you want to rearrange the order, just select the school and drag it into the desired position.

Welcome to a new way to search for colleges. Our search utilizes a "fuzzy" approach to ranking your preferences. That way, not only do you get a list of schools that match your needs perfectly, but you'll also see the ones that come close.
